## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

(1) the specifics of the device being comprised of a vertically aligned liquid crystal display having pixel electrodes with slits or projections and where a vertical to horizontal length ratio of each electrode region is larger than that of the corresponding pixel electrodes comprising a first embodiment which corresponds to Claims 1-4;

(2) the specifics of the device being comprised of a vertically aligned liquid crystal display having pixel electrodes where the vertical to horizontal length ratio of the pixel electrodes greater than or equal to 2 and not having orientation controllers comprising a second embodiment which corresponds to Claims 5-9;

(3) the specifics of the device being comprised of a vertically aligned liquid crystal display having pixel electrodes spaced from each other in the direction of the shorter edges of the regions and having orientation controllers extended along the longer edge comprising a third embodiment which corresponds to Claim 10;

(4) the specifics of the device being comprised of a vertically aligned liquid crystal display having pixel electrodes with slits or projections disposed in an alternating fashion comprising a fourth embodiment which corresponds to Claims 11-13;

(5) the specifics of the device being comprised of a vertically aligned liquid crystal display having pixel electrodes having a gap between adjoining pixel electrodes

where the orientation controllers are situated comprising a fifth embodiment which corresponds to Claims 14-16.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Claims 14-16 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Y. Wang whose telephone number is 703-305-7242. The examiner can normally be reached on M-F, 8 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H. Kim can be reached on 703-305-3492. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
